TO WHOM IT MAY CONCERN

North Constructions were the successful tenderer for the construction of the New Kincumber Library for Gosford City Council, and completed the project in 2003. The construction cost was approximately \$1.5M.

Brewster Hjorth Architects were the Design / Documentation Architects for the project, and acted as the Administration Architect during construction.

Mr Phil Thomson of North Construction was the Project Manager / Site Foreman for the works while Mr Tim Cornish was also involved in the Administration of the works.

The project was delivered on time and within budget, with a high standard of workmanship. North Constructions were proactive during construction, providing practical and cost saving solutions to the various building issues that arose during the works. They also displayed a high level of on-site experience, and were very positive to deal with on both on-site details and contractual matters.

We have no hesitation in recommending North Constructions for other projects, and would be comfortable using their company on future Brewster Hjorth projects.

Should you have any queries relating to any of these matters please do not hesitate to contact me.
